

# Tapori Invitation to all the children who will participate in the Olympics

**Once upon a time...  
a world where each child brings his or her stone!**

A pebble, a painted stone, a lump of coal, gravel from a construction site, pieces of jade, crystals, a broken piece of wall, a shell...

... Collected...

Collected in your school yard, in a historic place of your city, from a workplace near to you, where you like playing, a stone that symbolises poverty in your city...

Come to the Olympics of Kielce with a stone which is important for you.

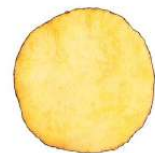

Come with a stone for which you want to say:

**" my heart is in this stone "**.

Come with a stone and write a small message which explains why you chose it.

In Kielce, during the Olympics, the Tapori movement ([www.tapori.org](http://www.tapori.org)), which gathers children of the whole world to build friendship and say "no" to exclusion, will invite you to gather the stones of all the children to form a sculpture.
